RE: Food Service Establishment Recognition

### For Immediate Release

The Lee County Health Department would like to recognize the following Lee County food service establishments for their efforts toward proper food handling for April, 2008. The criteria for this recognition are as follows: Those recognized are facilities that did not receive the following 4 violations during their inspection in the month of April; 1) Temperature Violation and or lack of temperature monitoring 2) Proper hand washing and personal hygiene and 3) Cross contamination of food products and/or surfaces 4) Presence or evidence of rodents/roaches or conditions conducive to rodents/roaches. These violations represent the highest potential for causing food borne illness. This list contains only those food service facilities inspected for the month of April. Not all facilities are inspected each month. The lack of these 4 critical violations is for the time of the inspection only and does not take into account hours of operation for which an inspection did not take place. While this Department does not recommend one facility over another, we would like to thank those facilities that continue to practice good food safety.
